“FOOD PRINT”:

The environmental cost of food

CNRxEXPO together with:

11 July 2015

Italian Pavilion - Expo 2015, Milan
from 2.00 to 5.00

Milan – July 11, 2015

The environmental cost of food: the case study of livestock farming

Pierpaolo Duce

National Research Council
Institute of Biometeorology

A Question for You

Do you know who wrote this quote?

If we are not narrow minded, we can find that implementing innovative, low carbon production processes with limited environmental impacts can be very profitable. We have to trace the path towards different opportunities, which do not imply to stop human creativity and the dream of progress, but rather to channel this energy in a new way
